INTRODUCTION

PLEASE READ THIS INTRODUCTION FIRST – IMPORANT

Postal Service employment includes great pay and benefits, paid holidays off, advancement potential and job security. As part of the hiring process for a Postal Service career position, you will be required to take an exam. Please refer to the Postal Service section of the separate Guide for a detailed description of the hiring process. There are 4 exams covered here. They are covered together here, because the exams are similar in their content. The Postal Service exams covered here are NOT designed to see how smart you are. These exams are designed to see if you are a good fit for the position. PREPARATION for the exam is the key to success. By going through the material we cover here, you WILL be prepared and you can therefore be successful. So, if you're not typically a good test taker, don't worry, we will prepare you here so you can be successful.

The Postal Service refers to this exam as an "assessment". So during this process the words "exam" and "assessment" refer to the same thing. The Postal Service uses a system called the Virtual Entry Assessment or VEA for short. So you may also see "VEA" in some places, this simply refers to the system the Postal Service uses for the exam process. Please refer to the separate Guide for a more detailed description of the Postal Service VEA exam system. You do NOT have to take the same exam repeatedly. Once you take an exam and pass it, that makes you eligible for ANY position that requires that same exam.

Some Postal Service exams give a numeric score while other Postal Service exams give an "Eligible" (passed) or "Ineligible" (failed) score. On exams with a numeric score, a score of 70% is passing. We will provide you with an answer grid and an answer key, so you can check your answers and determine a score. But keep in mind that some sections such as the "Tell Us Your Story" section (described later in this intro), depend upon your personal history and experience (if any). So scoring that section is dependent upon you. For that section, we will simply give you the best answers, in their order.

The chart below shows you the types of positions that are covered by each exam.

Position types covered	Exam number
Mail Carrier positions (Mail Delivery positions)	MC 474
Mail Handler positions	MH 475
Mail Processing positions (Mail Processor)	MP 476
Customer Service positions, also known as Sales Service & Distribution positions (Postal Clerk)	CS 477

Please note the exams above are also called: VEA 474 or Mail Carrier exam, VEA 475 or Mail Handler exam, VEA 476 or Mail Processor exam, VEA 477 or Customer Service exam

Each exam includes certain sections. We have listed below a chart that outlines which exam contains which sections. Please note the PREVIOUS chart for the position type and exam number AND then refer to the chart BELOW for the exact sections included in that exam.

Exam Number	Sections Included
MC 474	<ul style="list-style-type: none">• Tell Us Your Story• Describe Your Approach• Work Scenarios
MH 475	<ul style="list-style-type: none">• Tell Us Your Story• Describe Your Approach• Work Scenarios• Check for Errors
MP 476	<ul style="list-style-type: none">• Tell Us Your Story• Describe Your Approach• Work Scenarios• Check for Errors
CS 477	<ul style="list-style-type: none">• Tell Us Your Story• Describe Your Approach• Work Situations (same as “Work Scenarios”)• Work Your Register

We will now describe each section of the exam, it is CRITICAL to understand each section, as these sections combined, create the exam (different sections for each exam as outlined in the chart above). Before the actual exam sections begin, we will give you important **Tips and Suggestions** on the best way to answer questions in that section. But below is a summary of each section.

Tell Us Your Story – questions about various aspects of any past jobs you may have had (don’t worry if this is your first job, the questions allow you to simply answer if this is your first job), your attendance record, how your supervisor might rate you and working relationship with co-workers

Describe Your Approach – questions about how you deal with people, your attitudes toward certain aspects of work, how you would personally react in certain circumstances

Work Scenarios (Work Situations) – statements that describe possible work situations and then asking you what you would do or not do in those work situations

Check for Errors (exam MH 475 and exam MP 476 only) – this section tests your ability to notice differences in sets of numbers, determining whether sets of numbers are alike or different

Work Your Register (exam CS 477 only) – this section tests your ability to determine the fewest number of bills and coins when giving out change at a register, despite the name of this section, this is not a test of working an actual register

IMPORTANT

These exams are designed to determine if you are a good fit for the position. As you go through the exam, keep in mind, the Postal Service has created a profile with the employee traits and behaviors of the type of person the Postal Service feels would be most successful in the position. So First, you **MUST** realize the **TYPE** of person and employee traits the Postal Service is looking for. It is critical that you keep that in mind. The good news is that we will show you the type of person and employee traits the Postal Service is looking for. That way, no matter the question, you will know the best way to handle each question. Second, you need to understand the position, please refer to the job descriptions outlined in the Postal Service section of the separate Guide. The key to being successful on this exam is making sure that you know the type of individual and employee traits that the Postal Service is looking for in that job and understanding that job. To be successful on this type of exam, you **MUST** constantly remind yourself of the type of individual and employee traits that the Postal Service is looking for. We are not telling you to be untruthful, we are advising you as to the type of person and employee traits the Postal Service is looking for.

CRITICAL INFORMATION

We will now go over the type of person (employee traits) the Postal Service is looking for through the exam. It is very important that you keep these employee traits in mind as you take the exam. These employee traits below are covered **ALL** throughout the exam, so it's **CRITICAL** that you understand these employee traits. Also keep in mind as you take the exam, the position description, as you need to show that you are a good fit for that position.

Team Player – you need to show that you are willing and able to be a team player, by helping out your co-workers as needed to achieve the common goal of providing service to the public

Conscientiousness – this refers to following attendance rules, acting openly and honestly with co-workers and the public, not blaming others for mistakes

Positivity – being positive as you interact with both co-workers and the public, having a positive outlook on situations

Conformity – this refers to being able to work under supervision and conforming to work related rules, procedures and regulations

Social abilities – Postal Service employees need to interact with both co-workers and the public, so you need to show that you can communicate with people, get along well with others, be friendly and have an outgoing personality

Persistence – showing that you can persevere through challenges in order to complete tasks

Confidence – being confident about yourself and in your decisions; self-assured in your interactions with others

Routine oriented – many Postal Service positions depend upon a person's ability to follow a routine and perform the job successfully under those circumstances

Empathy – demonstrating that you have the ability to care and understand people's feelings

Time management – showing that you have the ability to complete tasks in a set amount of time

Resilience – this means being able to handle pressure effectively and work well in a fast paced environment

Organization – As many Postal Service positions depend upon a routine, it is important that you show you are able to keep things in order to accomplish tasks

Motivation and Drive – As some Postal Service positions work somewhat independently, you need to show that you are an ambitious person and can drive yourself to complete tasks

Hard working – As with any employer, the Postal Service is looking for people who are willing to work hard and go “above and beyond” expectations

Goal oriented – Since many positions have a routine and a set number of tasks that need to be completed by the end of the day, you need to show that you can set goals and achieve or surpass those goals

Personal accountability – this refers to being responsible for your actions and not tending to blame others

Final Note – Your state of mind is very important while taking this exam. In some sections, you will be asked the same *type* of question over and over, but simply described in different ways. It will be very important for you to remain consistent in how you answer these questions. It’s EXTREMELY important that you take the exam in a quiet place where you will NOT be distracted. You will not be able to answer the questions correctly AND consistently, if you are being interrupted during the exam.

Tell Us Your Story (MC 474, MH 475, MP 476, CS 477)

Description - In this section, you will be asked questions about various aspects of any past jobs you may have had (don't worry if this is your first job, the questions allow you to simply answer if this is your first job), your attendance record, how your supervisor might rate you and working relationship with co-workers. The questions are presented and you will have a series of choices for your answer. For the purpose of ALL the questions in this section, please treat military experience as one employer.

Tips and Suggestions - When completing this section, give yourself the benefit of the doubt, don't be afraid to be confident about yourself and any past employment. Sometimes people tend to have a negative view of themselves or their past, that is NOT advisable on this section. You need to be as positive about yourself as possible when answering the questions in this section. For example, there may be a question about how a past supervisor (if any) might rate you. Don't assume that you are simply average or below. Again, try to put yourself in the best light you possibly can with your answers in this section. Remember, you're trying to present yourself as the best possible potential employee. Also, if you have any prior work experience, make sure that your answers here align with any past jobs you may have had. For example, you may be asked a question about the amount of time you stayed with a previous employer. Make sure that this information lines up with your application.

Describe Your Approach (MC 474, MH 475, MP 476, CS 477)

Description - In this section, you will be asked questions about how you deal with people, your attitudes toward certain aspects of work and how you would personally react in certain circumstances. You will be presented with two statements. You will then be given a choice of stating whether one of those statements is most like you or somewhat like you. You first have to decide which of the two statements applies to you. Once you pick a statement that applies to you, you then have to decide whether that statement is somewhat like you or most like you. In other words, you need to first decide which of the two statement sounds like you more than the other statement. Then once you have picked that statement, you then need to decide if that statement is a lot like you or just sort of like you. Please be aware that these questions may have two statements that are similar, that are completely opposite or seemingly have no connection to each other at all.

Tips and Suggestions – The point of this section is to determine if you are the best fit for the position, by asking you questions that determine your employee traits and personality. The good news is that YOU have the power to help determine that with your answers. **BEFORE** doing this section, PLEASE go back and read the list of employee traits that the Postal Service is looking for, that was given during the Introduction. This is a section where it will be **VERY IMPORTANT** to have those employee traits in mind as you answer the questions. There will be many questions in this section, some of which will appear to be the same question being asked over and over again in a slightly different way. The exam is designed that way, to see if you will be CONSISTENT in your answers. It will be important to be consistent throughout this section. It's important that you evaluate each question and select the answer that allows your best self to show. Generally, on this type of exam section, instructions would say to work quickly, because they do not want you really thinking about the question. BUT, it's in YOUR best interest that you do think about the question and be sure of your best answer. So, essentially work as quickly as you can, BUT be absolutely sure that the answer reflects the best portrait of yourself.

In the series of statements below, determine which ONE statement is most like you or somewhat like you.

Work Scenarios (MC 474, MH 475, MP 476, CS 477)

Description - In this section you will be given statements that describe possible work scenarios or situations you might encounter on the job. You will then be asked what you would **MOST** likely do and **LEAST** likely do in those work situations.

Tips and Suggestions – **BEFORE** doing this section, **PLEASE** go back and read the list of employee traits that the Postal Service is looking for, that was given during the Introduction. It will be **VERY IMPORTANT** to have those employee traits in mind as you answer the questions. Also, make sure you understand the position, please refer to the job descriptions outlined in the Postal Service section of the separate Guide. By their nature, these questions/situations are more involved. So it will be important that you spend the time to make sure that you fully understand the question/situation before picking your answers. We strongly advise you to read the question/situation at least twice, *before* picking your answer. Many of the answer choices may seem reasonable to you. But you must simply choose the most and least likely actions you would take. When you are being asked to answer what you would **MOST** likely do, pick the strongest answer in your mind. When you are being asked what you would **LEAST** likely do, pick what would appear to you to be the **WORST** thing to do in that situation. Below is a list of specific additional **TIPS** to keep in mind:

- One key to these types of questions, is not to look at them from the viewpoint of what *would* you do in this situation, but more importantly, what *should* you do in this situation. In other words, think of these questions in such a way that you are picking what *should* happen.
- Don't allow yourself to get confused when reading the possible answers. You may need to read each answer a couple of times to make sure that you understand what that answer is saying in terms of an action.
- Active responses where you are showing a willingness to help are generally better than other passive responses.
- Consider answers based upon their effectiveness in the situation, solving a problem
- When faced with a confusing or detailed situation, try to describe the situation in one, more simple statement in your mind. For example, this situation is dealing with an upset customer or this situation is about team work, etc. This allows you to simplify the situation, to allow you to pick better answers.

Below you will find work scenarios for MC 474, MH 475, MP 476, CS 477

MC 474 Work Scenarios

Check for Errors (Exams MH 475 and MP 476 only)

Description – In this section you will be tested on your ability to notice differences in sets of printed numbers, determining whether sets of numbers are alike or different. You will be presented with a table that has 4 sets of 2 numbers in each question. You will then be asked to look at each of the 2 sets of numbers and determine if they are alike (Match) or different (Error). Because for each question, there is a table that has 4 sets of numbers, each question will have multiple answers, some number sets may Match and some number sets may be an Error.

Tips and Suggestions – Each set of numbers is typically 8 characters long. For most people, looking at that many numbers at one time can be confusing. So, simply break down the set of numbers into a more manageable number. For example, you can break down an 8 digit long number set into 2 groups of 4 numbers. For example, a number set may be 98625735, simply break that number set down into 2 groups of 4, like this: 9862 and then 5735, then do your comparison to the other set of numbers. Doing this makes it easier and quicker to recognize whether the 2 number sets are a Match or an Error. Also, if you see even 1 single number that is different, then that set of numbers is an Error. For it to match, EVERY single digit must match. Finally, some people are more successful when they either say or mouth out the numbers, out loud, as you work.

For each Location, select Match or Error. If the number sets are alike, select “Match”. If the number sets are different, select “Error”.

Work Your Register (Exam CS 477 only)

Description – In this section you will be tested on your ability to determine the FEWEST number of bills and coins needed, when giving out change at a register. Despite the name of this section, this is not a test of working an actual register. In the question, you will be presented with a transaction, giving you the total cost, amount paid by the customer and the amount of change to be given out. You will be given a diagram of bills and coins. That diagram will contain \$20 bills, \$10 bills, \$5 bills, \$1 bills, quarters (25 cents), dimes (10 cents), nickels (5 cents) and pennies (1 cent). You will then need to decide the FEWEST number of bills and coins needed to create that change amount. Since you are already being given the correct change amount in the question, a calculator should not be needed, but you are allowed to use a calculator, if you want to.

Tips and Suggestions – In these questions, you do NOT need to calculate the change amount, you are already given the correct change amount in the question. For the answer, you just need to determine the fewest number of bills and coins needed, to create the correct change amount. First, IGNORE the total amount and the amount paid, these numbers are NOT relevant. All you need to focus on is the change due amount. Here is the best way to answer these questions. For this example, we will have a change due amount of \$37.92. First, focus on the dollar bill amount. That number is \$37. Now ask yourself how many of the largest dollar bill amounts can go into \$37? The answer is 1 \$20 bill, 1 \$10 bill, 1 \$5 bill and 2 \$1 bills. That creates \$37 of the change amount, using the fewest number of bills. Next, focus on the coin amount, which is \$.92 (92 cents). Now ask yourself how many of the largest coins is needed to make \$.92 (92 cents)? The answer is 3 quarters (which creates 75 cents), 1 dime (10 cents), 1 nickel (5 cents) and 2 pennies (2 cents). That creates \$.92 (92 cents) of the change amount using the fewest number of coins. The golden rule here is to always start with the largest denomination of bills and coins and work your way down from there to create the answer. You may think that this is simple and be tempted to rush through this, DON'T do that. There's a relatively small number of these questions in this section, so getting the wrong answer on even one question can be harmful to you.

In this section you will need to use the fewest number of bills and coins necessary to make change for a customer's transaction. For each question below, determine the smallest number of bills and coins needed to create the change due.

Once you have determined the total number of questions answered for your exam, then simply divide the number of questions answered correctly by the total number of questions for your exam. This will give you a percentage score, (will look like .70, .78, .85, etc.). Remember, you may receive a number score or an “Eligible” score (pass), “Ineligible” score (fail) from the Postal Service. A numbered passing score is 70% (.70) or above.

Correct Answers divided by Total Questions = Percent Score

_____ ÷ _____ = _____
